

Michigan Tech Cable Television Systems

Michigan Tech Telecommunications Engineering maintains the following cable television systems.

MTU Cable: A primarily residential cable television system with approximately 1400 'homes passed' and about 1360 active drops. Content includes; broadcast, movie, information, world, sports, music, and entertainment channels. There are two premium channels also available to subscribers. Current cost for this channel is \$20/mo. See "MTU Cable Engineering Review 2007" for more details.

MTU Wideband: A cable system servicing the public areas of campus. This system has approximately 30 active drops and two or three channels of content. There is no charge for use of this system. See "MTU Wideband Review 2007" for more details.

It has been observed / reported that several other cable systems are in use on the campus. Details on these are unknown as each department maintains them independent of the central systems mentioned above. The system administrators for these areas maintain compliance with the FCC rules, system registration, reporting, frequency sweeps and general system upkeep.

SDC:

Ice arena and possibly other areas

Rozsa:

Event signs and possibly other areas

EERC / ETS:

Studio feeds to offices
